OIA-2024-4946

17 May 2024

[REDACTED]
[REDACTED]@nzme.co.nz

Dear [REDACTED]

I refer to your email of 4 March 2024 requesting, under the Official Information Act 1982 (OIA), information concerning the Communications and Information Systems (CIS) Change and Transformation Programme (CTP). Specifically, you requested the following:

1. CTP/DIP delivery

1.1 This report (section 3.2) mentions the Communications & Information Systems Change and Transformation Programme (CTP). It says two of the programme's three investments (Enterprise Cloud and Connectivity) had been approved by Cabinet and would be delivered in 2021. Did the CTP deliver the projects in 2021 as indicated in the report? If not why not?

1.2 I understand the programme was extended by another three years to 2024 without cabinet approval under a new name: Defence Information Platform (DIP) programme - is this correct?

The CIS CTP had three objectives to be delivered sequentially, which would ensure the Defence Digital Group (DDG) was best positioned to enable the Networked Combat Force by 2025. These objectives were:

- Objective 1. Embed the Digital Operating Model (CIS CTP)
- Objective 2. Deliver the Defence Information Platform (DIP programme), comprising of the:
 - a) Enterprise Cloud Project
 - b) Enterprise Connectivity Project
 - c) Enterprise Productivity Project
- Objective 3. Enable the Networked Combat Force

The CIS CTP was formally closed in September 2022 by New Zealand Defence Force (NZDF) Governance, having delivered the Digital Operating Model. The DIP programme was proposed in July 2022 and formally approved by NZDF Governance in September 2022.

The Enterprise Cloud, Connectivity and Productivity Projects faced challenges, which resulted in delays to their delivery. These challenges included balancing resourcing; technical design issues; delays in progressing cases through Cabinet for approval; and supply chain issues.

As at the time of your request, the Enterprise Cloud Project and the Enterprise Connectivity Project have approved Single Stage Business Cases and Project Implementation Business Cases (PIBC). The Enterprise Productivity Project was split into two phases, with phase 1's PIBC approved by Ministers in 2022 and the Phase 2 PIBC yet to be approved.

The NZDF's intent is to transfer all projects to DDG business as usual from December 2024, as this is considered the most appropriate way to finalise the delivery of them. Once the project deliverables are achieved the projects will be closed.

2. *CTP/DIP Funding and spending*

2.1 *For each year between 2015 and today (financial or calendar): how much baseline funding has the Communications & Information Systems Branch/Defence Digital Group received?*

The DDG budget for financial year 2015/16 to 2022/23, including operating and personnel expenses, is provided in the table below.

| Financial Year | DDG Budget Total (\$M) | DDG personnel (\$M)* | DDG operating (\$M) |
|----------------|------------------------|----------------------|---------------------|
| 2015/16 | \$78,643 | \$25,028 | \$53,615 |
| 2016/17 | \$82,239 | \$26,022 | \$56,217 |
| 2017/18 | \$94,715 | \$27,673 | \$67,042 |
| 2018/19 | \$117,593 | \$33,892 | \$83,702 |
| 2019/20 | \$132,784 | \$37,534 | \$95,250 |
| 2020/21 | \$129,910 | \$42,436 | \$87,475 |
| 2021/22 | \$131,346 | \$46,005 | \$85,341 |
| 2022/23 | \$141,932 | \$46,361 | \$95,571 |

*The DDG total personnel budget includes personnel dedicated to the CTP and the DIP Programme.

2.2 *How much of that funding was spent in that period on the CTP/DIP programmes? Please provide in a spreadsheet the following information:*

- *a breakdown of the spending per year (financial or calendar)*

The CTP and the DIP Programme were funded from within DDG's baseline, not as separate schemes. As a result, it would require a substantial collation and research effort to identify the costs associated with these programmes. This part of your request is declined in accordance with section 18(f) of the OIA.

- *a breakdown between internal spending and contractor/consultant spending*

As explained above, the CTP and the DIP Programme were not funded as separate schemes and would require a substantial collation and research effort to identify the costs associated with these programmes. The table below, however, provides the total DDG personnel costs and the total costs for contractors and consultants in DDG.

| Financial Year | DDG Personnel (\$M)* | DDG Contractors and Consultants (\$M)** |
|----------------|----------------------|---|
| 2015/16 | \$25,028 | \$0 |
| 2016/17 | \$26,022 | \$10,601 |
| 2017/18 | \$27,673 | \$12,869 |
| 2018/19 | \$33,892 | \$19,278 |
| 2019/20 | \$37,534 | \$24,320 |
| 2020/21 | \$42,436 | \$24,281 |
| 2021/22 | \$46,005 | \$19,651 |
| 2022/23 | \$46,361 | \$19,881 |

* The DDG total personnel budget includes personnel dedicated to the CTP and the DIP Programme.

**Financial data for contractors and consultants in DDG is not available prior to FY 2016/17. The data represents all work in DDG, not just for the CTP and the DIP Programme.

- *name each firm contracted out in the period, how much money they each received and a brief summary of the work they have done*

Please find enclosed a list of firms and the services they provided. A breakdown of spend for each firm is withheld in full in accordance with section 9(2)(j) of the OIA to enable, without prejudice or disadvantage, negotiations.

2.3 Please provide a list of what was delivered out of the spend in that period.

The CIS CTP delivered the following:

- An operating model design tailored to NZDF's operating environment.
- Future workforce design to support the operating model.
- The first digital strategy, roadmap and associated governance structures, processes, roles and responsibilities integrated into the wider enterprise governance.
- The Defence Cyber Security Centre that provides protection to the Defence Information Environment and Platform.
- A total-cost-of-ownership model developed to help understand cost drivers and support whole-of-life service support.
- Key business cases that were approved to implement the Defence Information Platform Projects: Enterprise Cloud, Connectivity, and Productivity.

The Enterprise Cloud Project will provide off-premises Cloud computing for the Restricted and below network and on-premises Cloud computing for the Secret and above network on Microsoft Azure infrastructure. The Cloud Restricted and Below Platform is scheduled to be complete by December 2024.

The Enterprise Connectivity Project will provide Restricted and below network access through Telecommunications-as-a-Service for all domestic NZDF sites, including centrally managed mobile devices, secure encrypted email, and email filtering. Network connectivity upgrades at NZDF domestic sites is underway, with a focus on upgrading the nine major camps and bases. Based on the current delivery timeframes, this project is due to be complete by December 2024.

The Enterprise Productivity Project will refresh devices and unify communications. It will provide solutions that allow users to access the Restricted and below network, which will include a modern virtual desktop and modern productivity tools to enable collaboration. The refreshed virtual desktop is scheduled to rollout to 15,000 NZDF users from July – December 2024. The delivery of refreshed productivity devices was announced by the Government on 10 May as part of its Budget 24 Defence announcement.

3. Technology-related costs

3.1 How many technology planning days have happened between January 2016 and today, and what was the total cost of these?

The NZDF is unable to provide information from 2016 to 2018 without a substantial collation and research effort. From January 2019, there were 19 two day planning events which cost approximately \$1.35 million.

3.2 How much has the NZDF spent on overseas travel relating to information and technology for non-military personnel between January 2016 and today. Please provide a reason and cost for each instance of travel.

The total travel cost for military personnel and civilian staff from January 2016 to January 2024 was \$2,585,768. A breakdown by civilian staff is declined in accordance with section 18(f) of the OIA as the information cannot be provided without a substantial collation and research effort.

You have the right, under section 28(3) of the OIA, to ask an Ombudsman to review this response to your request. Information about how to make a complaint is available at

www.ombudsman.parliament.nz or freephone 0800 802 602.

Please note that responses to official information requests are proactively released where possible. This response to your request will be published shortly on the NZDF website, with your personal information removed.

Yours sincerely

AJ WOODS

Air Commodore

Chief of Staff HQNZDF

Enclosure:

1. CIS CTP and DIP Programme: List of firms and the service provided

Enclosure 1

CIS CTP and DIP Programme: Firms, Service Provided

| Financial Year | Vendor | Service Provided | Details of Contract |
|----------------|-------------------------|---|---|
| 2022/23 | Absoluteit Ltd | Business Support | Service Management Analysis Support. |
| 2022/23 | Accenture NZ Ltd | Spacial Architect | Spacial Architect. |
| 2022/23 | Agile Colab Ltd | Training | Development and Operations Coaching. |
| 2022/23 | Assurity Consulting Ltd | Consultancy | Testing Consultancy for Organisational Test Strategy and Test Planning. |
| 2022/23 | Axenic Ltd | IT Security Services | Microsoft Azure Cloud Security Assurance. |
| 2022/23 | Axenic Ltd | IT Security Consultancy | Cloud Integration Platform Security Design review. |
