

New Zealand Defence Force Future Procurement Opportunities – July 2026

The New Zealand Defence Force (NZDF) periodically publishes indicative information about potential procurement activities it is considering over the next 12 to 18 months. This information is provided to support early market awareness and supplier planning.

These are not confirmed tender opportunities. All potential procurements remain subject to internal prioritisation, detailed scoping, and the necessary approvals, including funding allocation. As such, timing and scope may change, and some opportunities may not proceed.

This document does not include our in-progress procurements. To view these, please look at our openly advertised GETS listings. It also does not show the procurements that are no longer going ahead due to funding or prioritisation decisions.

Where appropriate, and once there is greater certainty, NZDF will release formal notices through the Government Electronic Tenders Service (GETS), in line with the Government Procurement Rules.

Suppliers are not required to respond to this indicative information. Instead, we encourage suppliers to use this information to consider future capability alignment, resourcing, or partnership opportunities within the industry in preparation for possible future engagement.

We expect to post the next version of this pipeline in early 2027. Any questions regarding future tenders should be addressed to: dcs.vm@nzdf.mil.nz

Released under the Official Information Act 1982

Ref.	Opportunity Name	Opportunity Description	July 2026 Status
1	<i>Information Management Programme</i>	The procurement of initial setup services (e.g. architecture support) for the initial phase of the Information Management (IM) Programme (a digital transformation programme aimed at addressing challenges with NZDF's current information systems and processes).
